September 20, 2001

Dear [REDACTED]:

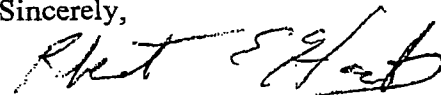

As you know, the Wyoming Department of Health and the Casper-Natrona County Health Department are holding several samples of meat belonging to you. These samples were taken for possible sentinel analysis. However, the agencies investigating your complaint have been unable to locate a laboratory to perform that analysis. In addition, EPA has now provided direct human and environmental sampling that makes it pointless to consider pursuing analysis of the meat any further.

We would now like to return all of the meat samples to you. These samples are your property, and we need you to tell us how you wish us to proceed. If you wish to have these samples returned to you, we will ship them to you frozen, by delivery service. If you prefer, we will discard them.

Please notify us before Close of Business on Friday, October 19, 2001. If we have not received instruction from you at that time, we will discard the samples.

If you have any questions, please feel free to call me at 235-9340, or you can call Dr. Richard Harris, Wyoming Health Department Laboratory Director, at 307-777-7431.

Sincerely,

Robert E. Harrington, MS, RS  
Director
